

## YOGYATA ONLINE

IIT-Bangalore offers Yogyata Online, an online training and certification program for the IT industry. The goal of the program is to prepare students for a successful career as a software developer in the IT industry. Students will receive training in software development on the Java platform.

As part of this online training program, students receive access to an Online Learning portal that has multimedia-based lessons authored by highly qualified professionals in the industry. The Learning portal has a number of other learning resources as well (details on website) and is available 24x7 to students.

IIT-B uses a continuous assessment process to measure the progress of the student. On clearing the final assessment, students become eligible to receive a Professional Certificate in Software Development from IIT-B. These students also become eligible to participate in the campus placement opportunities organized by IIT-B.

- Campus placement opportunities at the end of the program

## BLENDED-LEARNING MODEL

MUTIMEDIA LESSONS	Online Learning portal with over 250+ hours of multimedia-based content available 24x7 to students.
LEARN BY DOING	Built on principle that students learn best when they practice what they do. Structured tasks assigned to students on a regular basis. On completion, tasks are evaluated and feedback is provided to students.
LIVE WEB SESSIONS	High-quality mentoring from Industry experts provided through web conferencing technologies.
COLLABORATIVE LEARNING	Students learn from each other on the Learning Portal through discussion forums and chat.
SELF ASSESSMENTS	To help students check whether they have learnt what they need to learn. Tests are available for every lesson in the curriculum.
FINAL ASSESSMENT	To ensure that students have actually acquired all the skills required to excel as a software developer in the IT industry.
